

COVID-19 PRE-SCREENING

Did you know that as a homecare employee you're **required** to complete daily self-COVID-19 screens and report any symptoms to your Attentive Care Supervisor?

Before your shift, ask yourself the follow question:

Do you currently have any of the following COVID-19 symptoms: fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea?

Yes

No

If you answered “**yes**” to having any of these symptoms, or have tested positive for COVID-19, call Attentive Care prior to your shift with your client and speak to your Field Staff Supervisor, Nursing Supervisor or On-call Field Staff Supervisor for further direction.

Based on your symptoms, status, or known exposures, you may be instructed to use additional personal protective equipment (PPE) such as wearing a N95 or surgical mask when providing patient care.

Remember, it's your responsibility as a healthcare professional to help stop the spread of infection and keep your clients safe.
